

POWERFIX PLASTICIZER (MN - 531)

▶ BENEFITS

- Water reducer PLASTICIZER
- Improve strength
- Increases work ability
- Minimize casting time
- Reduces W/C ratio up to 15 to 20%
- Better compaction and finishing
- Admixtures for concrete pre-casting

▶ APPLICATIONS

- Cement Bricks
- Paver Block
- Column and Bims
- Flyover
- RCC Roads
- Concrete Repairs

▶ PHYSICAL PROPERTIES

Physical Form	:	Liquid
Color	:	Light Brown
Solid content	:	28% to 30%
Specific gravity	:	1.15 to 1.20 kg/ltr

▶ DOSAGE

300 ml to 500 ml
per 50 kg Cement

▶ PACKAGING

50 kg to 250 kg

POWERFIX ADMIX POWER 603

▶ DESCRIPTION

ADMIX POWER 603 is a super plasticizing & retarding admixture for concrete which provides a plasticizing and cohesive concrete mix with increased durability and reduced shrinkage in the hardened state.

▶ AREA OF APPLICATION

- Improves workable time by controlled retardation
- Improves compaction due to increased workability, without bleeding and segregation
- Reduces shrinkage
- Lowers permeability.
- High ultimate strength without increasing cement content
- Compatible with all types of OPC / OPC + Fly Ash / PPC/ PSC/ GGBS and with other pozzolonic/ cementitious materials.

▶ BENEFITS

- Reduces shrinkage, Low permeability
- Improves workable time by controlled retardation
- High ultimate strength without increasing cement content
- Compatible with all types of OPC / OPC + Fly Ash / PPC/ PSC/ GGBS and with other cementitious materials
- Improves compaction due to increased workability, without bleeding and segregation

▶ DOSAGE/ USAGE

Generally dosed in the range of 0.5 to 1.0% by weight of cementitious materials. But go for trial mix for finalizing the dosages.

▶ SAFETY

ADMIX POWER603 is non-toxic and inflammable. When in contact with skin, it can be washed with water.

▶ PACKING

50 kg / 250 kg
Coverage as per site condition
