

POWERFIX FLOOR HARDENER

DESCRIPTION

Powerfix Floor Hardener is a mixture of aggregates, plasticizer and cement binder. It is an economical concrete floor hardener recommended for both interior and exterior use. POWERFIX FLOOR HARDENER produces a hard, dense, wear resistant surface which resists corrosion and absorption grease, alkalis and most chemicals. POWERFIX FLOOR HARDENER is available in Grey, Red and Green color.

USAGE

Lobbies, Commercial Corridors, Restaurants, Dairies And Public Buildings, Auto Showrooms, Service Centers, Factory And Warehouse Floors

USAGE

Calculate the total quantity of POWERFIX FLOOR HARDENER to be used, Remove any bleed water, which is present on the surface. Applying the First Shake Transfer POWERFIX FLOOR HARDENER powder from the bags to pails of a size convenient for handling by the person walking on the freshly floated surface. When the concrete has set enough to leave a 3-6 mm foot print on the surface, start broadcasting 2/3rd of the quantity evenly over the surface. As soon as the material darkens, start working on the surface with wooden float. Power flats can be used but make sure that the surface is not overworked which results in excessive moisture surface.

Immediately after the leveling of the fresh concrete, sprinkle by hand at a rate of 5 kg / m² in strips of 10 cm width along the bay edges (i.e. 0.5 kg per running meter)

40 kg

PACKING & COVERAGE

Packing : 40 kg
Light duty : 3 kg/m²
Medium duty : 5 kg/m²
Heavy duty : 7 kg/m²

SHELF LIFE & STORAGE

12 Months from the date of manufacturing in unopened condition.
